Hospital emergency wards, admission rooms

Hospital emergency wards and admission rooms provide medical care in situations that pose a sudden threat to health or life. Medical services conclude with a discharge with recommendations or a decision to transfer the patient to a hospital ward for continued treatment.

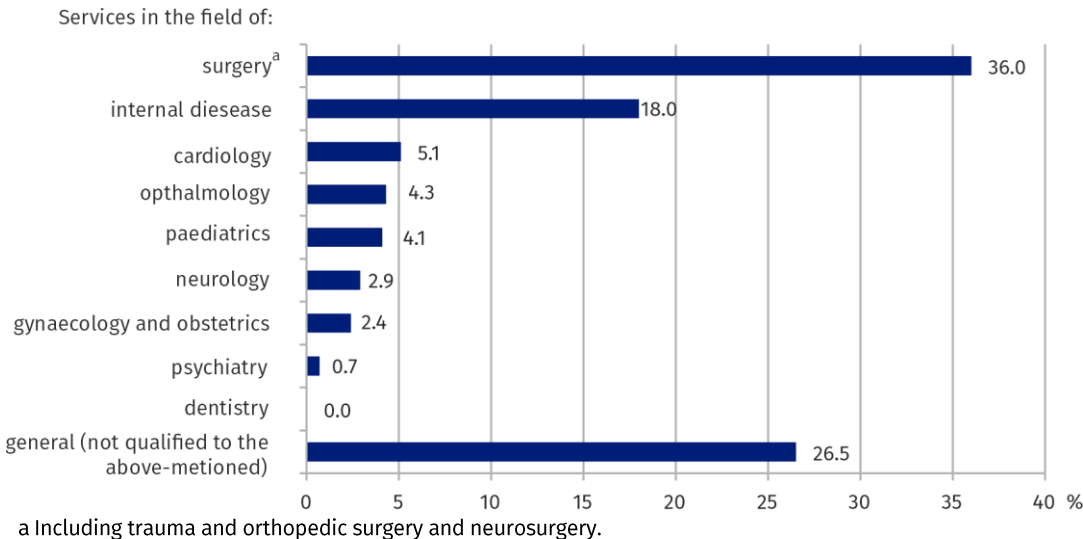

In 2025, in admission rooms or hospital emergency wards, outpatient emergency medical services were provided to a total of 937.3 thousand persons (by 5.9% more than in the previous year), of whom 729.6 thousand were discharged home after receiving health services, and 207.7 thousand received hospital treatment. Children accounted for 18.9% of the total number of persons receiving health services, and persons aged 65 and over accounted for 28.1% (compared to 18.8% and 27.9%, respectively, in 2024).

The number of persons to whom outpatient emergency services were provided increased by 5.9%

Patients whose medical services ended with discharge to home most often used services in the field of surgery (36.0%) and internal medicine (18.0%).

Admission rooms and hospital emergency wards provided nearly 170 out-patient health care services per 1,000 population of Mazowieckie Voivodship

Chart 3. Structure of out-patient medical services provided in admission room or hospital in 2025

In the admission room or hospital emergency ward, most people used health services that ended with discharge to home in the field of surgery
