In February 2026 – as in the previous month – in 15 PKD 2025/NACE Rev. 2.1 sections, men's average monthly gross wage and salary was higher than women's average monthly gross wage and salary

Data source: results of the Survey on the Distribution of Wages and Salaries in the National Economy.

Starting with the data for January 2026, the survey results are compiled in accordance with the Polish Classification of Activities 2025, introduced by the Regulation of the Council of Ministers of 18 December 2024 (Journal of Laws of 2024, item 1936). Due to this change, data broken down by PKD/NACE section, as well as by sector of the national economy, are not fully comparable with results from previous periods.

The presented data on wages and salaries cover monetary payments under the title of an employment relationship or a service relationship to employees, as well as payments under contracts of mandate, contracts to perform a specified task and agency agreements, if these contracts were concluded with the same employer or to the benefit of the same employer with whom a given person is employed on the basis of an employment relationship.

There is a wider range of data on the distribution of wages and salaries in the publication tables.

Choropleth maps presenting data from the Survey on the Distribution of Wages and Salaries in the National Economy are available on the Geostatistics Portal.
