

Out-patient health care in Mazowieckie Voivodship in 2025

25 June 2026

 **4.3%**

Increase in the number of out-patient consultations compared to 2024

At the end of 2025, out-patient health care was carried out by 3834 out-patient departments and 205 medical and dental practices providing services funded by public sources. In 2025, 60.8 million out-patient consultations were provided – 53.9 million medical and 6.9 million dental consultations.

Out-patient departments and medical practices

At the end of 2025, there were 4039 providers of out-patient health care, of which 3834 out-patient departments as well as 20 medical practices and 185 dental practices providing services funded by public sources.

At the end of 2025, 15% of out-patient departments were owned by public sector entities

Table 1. Out-patient health care providers

As of 31 December

SPECIFICATION	2024	2025	
	In absolute numbers		2024=100
Total	3889	4039	103,9
Departments	3685	3834	104,0
urban areas	3081	3217	104,4
rural areas	604	617	102,2
Practices ^a total	204	205	100,5
medical	22	20	90,9
dental	182	185	101,6
urban areas	113	118	104,4
rural areas	91	87	95,6

^a Data include practices that have signed contracts with the National Health Fund or out-patient departments.

Compared to 2024, the number of out-patient health care providers increased by 4.0%, with an increase both in urban and in rural areas. The number of medical practices i.e. those that signed contracts with the National Health Fund decreased by 9.1%, whereas dental practices increased by 1.6%.

In 2025, the number of medical and dental practices that signed contracts with the National Health Fund increased

At the end of 2025, there were 1363 persons per out-patient health care provider (by 53 persons fewer than a year before). The indicator in question was 2.5 times higher in rural areas (2757) than in urban areas (1069).

In Mazowieckie Voivodship, 92.6% of out-patient health care providers were adapted to the needs of the disabled. Most of the providers — 61.9% were equipped with ramps or platforms facilitating the entrance to the building, 36.2% had non-slip floors and 29.1% an elevator. 6.5% of out-patient health care providers had facilities for the visually impaired and the blind, and 6.71 for the hearing impaired and deaf.

Out-patient consultations

In 2025, there were 60,847.4 thousand out-patient consultations provided, i.e. by 4.3% more than in 2024. The vast majority of consultations (88.2%) were provided in urban areas.

On average, there were four times more out-patient consultations per urban resident than per rural resident

Table 2. Consultations provided ^a in out-patient health care

SPECIFICATION	2024	2025	
	In thousands		2024=100
Consultations provided	58356,1	60847,4	104,3
of which via telephone	6936,9	7523,4	108,5

in the infirmary	740,9	674,9	91,1
at the patient's home	23,0	18,3	79,6
via telephone	13,3	15,1	113,5
In specialised care	34002,8	36512,5	107,4
medical	27759,2	29581,6	106,6
of which via telephone	4170,1	4786,2	114,8
dental	6243,7	6931,0	111,0
of which via telephone	1,7	1,4	79,7

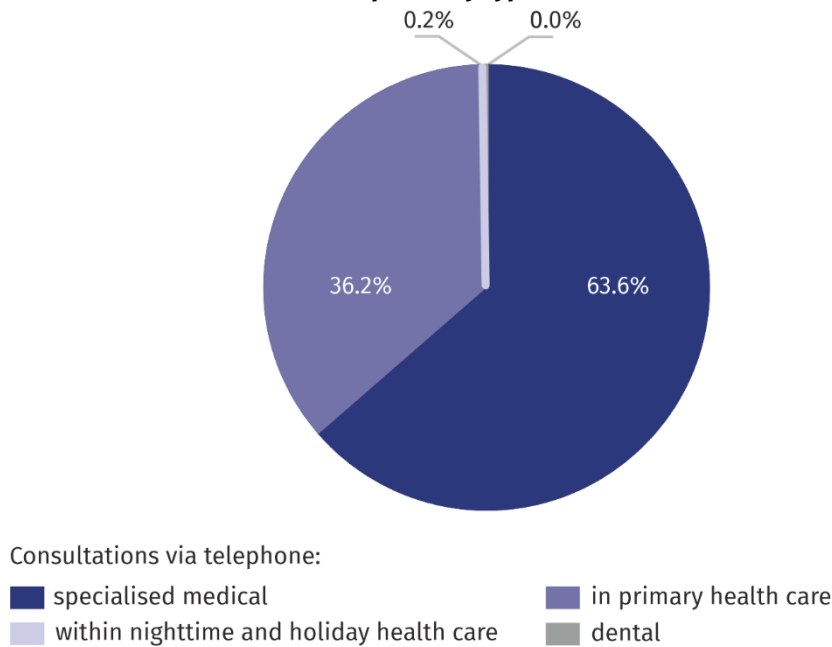

12% of total out-patient consultation was provided via telephone

a Including consultations paid by patients (non public sources); without consultations from the admission rooms of general hospitals. b Primary health care services provided from Monday to Friday from 6.00 p.m. to 8.00 a.m. the following day and 24 hours a day on public holidays. including consultations under subcontracts with the hospital to carry out that consultations.

The average number of out-patient consultations per capita in 2025 was 11.1, with this indicator being 4 times higher in urban areas than in rural areas and amounting to 15.1 and 3.7, respectively.

Consultations via telephone, i.e. consultations provided remotely using a telephone connection or another ICT system, accounted for 12.4% of all out-patient consultations provided (in 2024 – 11.9%).

Chart 1. Structure of consultations via telephone by type of consultation in 2025

Most out-patient consultations were provided in specialised care – 36,512.5 thousand, i.e. 60.0% of the total, including 11.4% by dentists. Consultations via telephone accounted for 13.1% of all specialised consultations provided.

Consultations provided in primary health care accounted for 23,626.4 thousand consultations, i.e. 38.8% of all out-patient consultations. Primary health care doctors also provided 186.7 thousand, i.e. 0.8%, of consultations at the patient's home.

708.4 thousand consultations were provided within nighttime and holiday medical service, i.e. 1.2% of all out-patient consultations. Most of them were provided on an out-patient basis – 95.3%, while telephone consultations constituted 2.1%, and consultations at the patient's home – 2.6%.

Out-patient consultations were more often provided to women. In the field of specialist care they constituted 60.4%, in primary care – 57.8%, while within nighttime and holiday medical service – 55.8%

In 2025, more than half – 54.3% of consultations were provided to persons aged 18-64, aged 65 years and more – 28.0%, and aged 0-17 years – 17.7%.

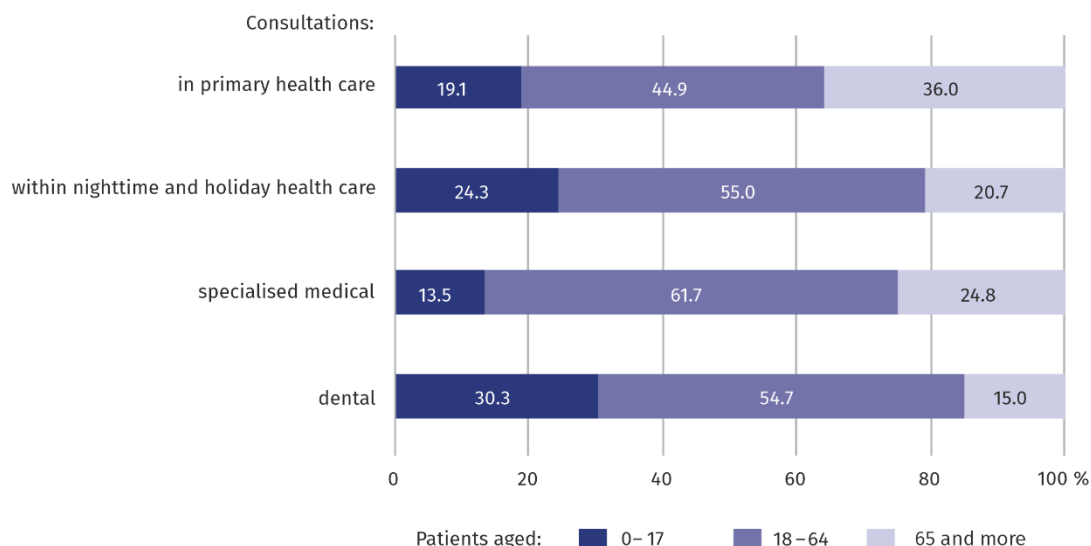

Children and youth in the age group 0-17 years were provided with 10,785.4 thousand consultations, of which 41.9% in primary health care (a decrease of 2.9 pp per year), 37.1% were specialised medical consultations (an increase of 0.3 pp), and 19.5% – dental consultations (an increase by 3.1 pp), and 1.6% – consultations within nighttime and holiday medical service (a decrease by 0.4 pp).

In the age group of 65 and more, there were 17,036.2 thousand consultations provided, the most in primary health care – 49.9% (a decrease by 0.6 pp per year). Consultations of specialised medical care accounted for 43.1% (an increase of 0.4 pp), dental consultations – 6.1% (a 0.3 pp increase), nighttime and holiday medical service consultations – 0.9% (no changes compared to 2024).

28% of consultations via telephone within nighttime and holiday medical services were provided to persons aged 65 and more

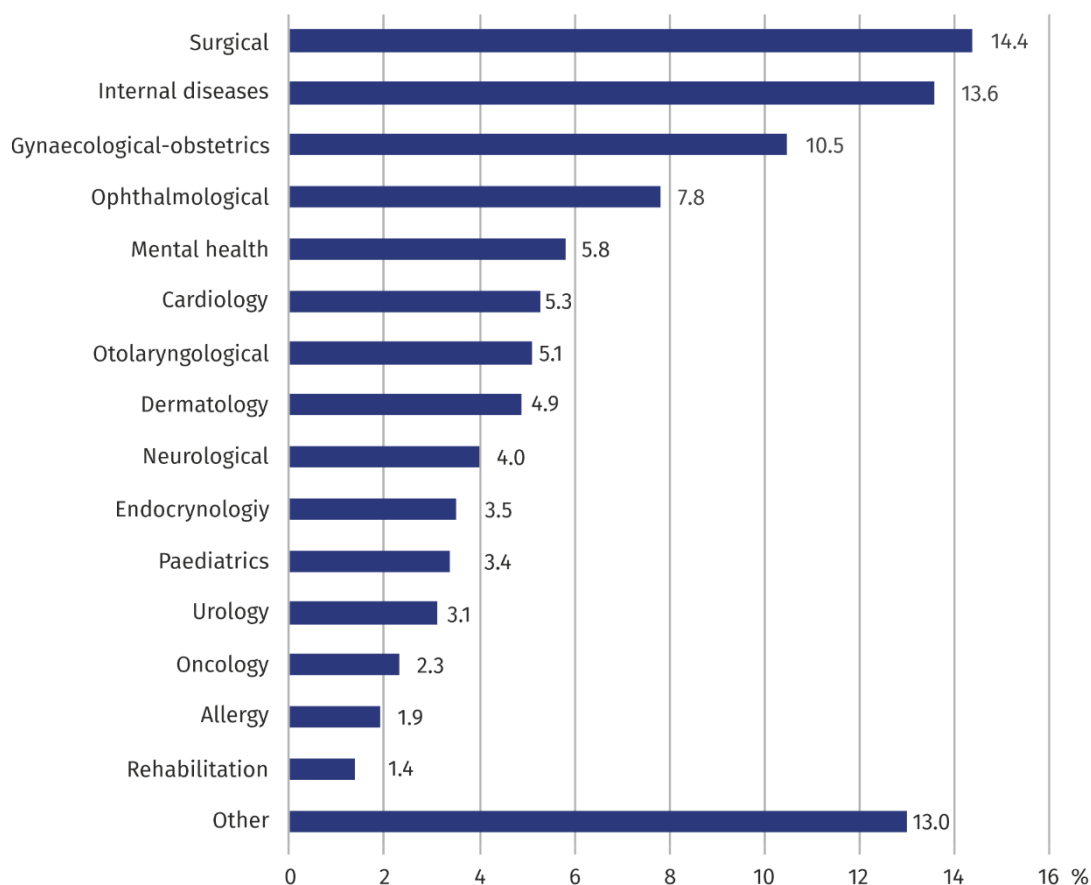

59% of total out-patient health care consultations were provided to women

Chart 2. Structure of out-patient consultations by type of consultation and age of patients in 2025

Every third primary health care consultation was provided to persons aged 65 and over

Chart 3. Structure of specialised medical consultations by type of clinic in 2025

Most (4.3 million) medical consultations in specialised care were provided in surgical out-patient clinics

Compared to 2024, the number of specialised consultations in mental health clinics increased by 6%
