a From and to Poland.

Differences in expenses, also in terms of the assortment structure of products, were observed on individual sections of the border both among foreigners as well as Poles. It is associated with the way of travelling, destination, length of stay and profitability of shopping abroad, among other things.

Local border traffic

In the 2nd quarter of 2026, 171.7 thousand crossings of the Polish border with Ukraine made by foreigners as part of the local border traffic (LBT) were recorded. Compared to the same period in 2025, there was a decrease of 6.0% in crossings under the LBT regime, and a decrease of 0.3% compared to the 1st quarter of 2026. The value of expenses incurred by foreigners crossing the border under the LBT regime in the 2nd quarter of 2026 amounted to PLN 73.9 million (a decrease of 10.2% compared to the same period of the previous year).

In the 2nd quarter of 2026, local border traffic accounted for 3.9% of crossings of Poland's land border with Ukraine by foreigners

Chart 4. Local border traffic of foreigners on the Polish-Ukrainian border

Range of border impact

The results of the surveys show that in the 2nd quarter of 2026 both foreigners and Poles crossing the Polish land border were mostly residents of the villages located at a distance of up to 50 km from the border – 74.5% foreigners and 72.2% Poles, with 56.0% of foreigners and 59.4% Poles living in the area up to 30 km from the border.

Map 1. Range of impact of the border on the basis of crossing the sections of the border by foreigners in the 2nd quarter of 2025

Both foreigners and Poles crossing the Polish land border were mostly residents of places located up to 50 km from the border

As to the external border of the European Union in Poland, 54.2% of foreigners and 73.1% of Poles crossing the Polish land border lived at the distance of up to 50 km from the border, and in the case of the internal border of the European Union 77.9% and 72.2%, respectively.

Map 2. Range of impact of the border on the basis of crossing the sections of the border by Poles in the 2nd quarter of 2026

The majority of both foreigners and Poles crossing the Polish land border made purchases within 50 km from the border

Most of the surveyed foreigners made purchases at the distance of up to 50 km from the border. In the case of the external border of the European Union in Poland it was 59.5% of those crossing the border, and in the case of the internal EU border – 86.1%. On the other hand, of those crossing the border, Poles making purchases at the distance of up to 50 km from the border constituted 89.3% in the case of the external border and 63.9% in the case of the internal border.

Methodological notes

1. Presented information was developed on the basis of the survey results of "Trips made by non-residents to Poland. The movement of vehicles and persons at the Polish border with the countries of the European Union" and "Participation of residents of Poland in trips" included in the program of statistical surveys of official statistics. The survey methodology has been prepared by Statistics Poland, Statistical Office in Rzeszów in cooperation with the National Bank of Poland and the Ministry of Sport and Tourism. Since 2014 the surveys conducted jointly by these institutions are the result of the integration of four surveys (including "The survey of goods and services turnover at the external land border of European Union on the territory of Poland").
2. The survey on trips made by foreigners (non-residents) to Poland and the movement of vehicles and persons at the Polish border with the countries of the European Union in the second quarter of 2026 was carried out in the field by statistical interviewers. The results of the survey were also prepared using other data sources. The survey of trips made by foreigners (non-residents) includes those leaving Poland by internal and external border of EU in Poland. Persons who have been living in Poland for over one year are not covered by the survey with the exception of those travelling for educational and health purposes. Data on expenses incurred by foreigners (non-residents) in Poland include goods purchased in Poland for resale in the country of foreigner. The survey of border traffic (in both directions – from Poland and to Poland) covers persons and vehicles crossing the Polish border with the European Union at selected border crossings.
3. Survey on the participation of Poles (residents) in trips is conducted in households on a quarterly basis (in the month following the quarter) using mainly the telephone method. The survey does not cover persons staying abroad for more than one year with the exception of those travelling for educational and health purposes. The presented data on expenses incurred abroad by residents include expenses financed only from own funds (expenses financed by workplace and other individuals and institutions are not included) and also goods purchased abroad for resale in Poland.
4. Data on border traffic at the external border of the EU in Poland come from the Border Guard Main Headquarters and concern the number of crossings of the border. A person crossing the border several times is counted as many times as he/she crosses this border. Data cover all border crossings (road, rail and river).
5. The agreement between the Government of the Republic of Poland and the Cabinet of Ministers of Ukraine on the principles of local border traffic entered into force on 1 July 2009.
6. The agreement between the Government of the Republic of Poland and the Russian Federation on the principles of local border traffic entered into force on 27 July 2012, however, from 4 July 2016 it remains suspended.
7. The rules for crossing the border at specific border crossing are defined in the Regulation of the Minister of Internal Affairs and Administration of 13 March 2020 on temporary suspension or restriction of border traffic at specific border crossing (Journal of Laws of 2020, item 435, with later amendments).
8. Due to rounding the sums of the figures may differ from the figure "total" in some cases. Relative numbers (indicators, percentages) were calculated on the basis of absolute data expressed with more accuracy than it was given in the report. These numbers are correct in terms of content.
9. The presented data are preliminary.
